

Date: 12 December 2014

Problem: any button works in the WDNetXL/EPR-MOGA-XL/ANN-MOGA-XL main command window.

Possible cause: the problem is caused by security updates sent by Microsoft on 09 Dec 2014:

- [KB 2553154](#) for **Office 2010** (32-bit ad 64-bit)
Applies to Microsoft Office 2010 Service Pack 2
- [KB 2726958](#) for **Office 2013** (32-bit ad 64-bit)
To apply this security update, you must have the release version or Service Pack 1 for Office 2013 installed on the computer

Solution 1: Close all Excell files; Remove the file:

C:\Users\[username]\AppData\Local\Temp\Excel8.0\ **MSForms.exe**

Solution 2:

Office 2010 uninstall the update [KB 2553154](#)

[Note: Microsoft does not recommend that you remove any security update.]

To remove this security update, use the **Add or Remove Programs** item or use the **Programs and Features** item in **Control Panel**.

Note When you remove this security update, you may be prompted to insert the disc that contains Microsoft Office. Additionally, you may not have the option to uninstall this security update from the Add or Remove Programs item or the Programs and Features item in Control Panel. There are several possible causes for this issue. Please, in such case check fir Microsoft Assistance.

Office 2013 uninstall the update [KB 2726958](#)
