

[WNetXL](#)

A smart tool for integrated Water Distribution Network analysis is on-line!

[WNetXL](#) is a tool for students, practitioners and researchers as it offers a complete documentation on WDN analysis in form of MS-Office PowerPoint presentations, scientific documents and multimedial documents.

[WNetXL vr.2.0](#)

New function [WNetEditor](#) for network **editing** and **import from EPANET2**

Upcoming functions

Thanks to users' contributions the [WNetXL](#) package is continuously upgraded. New functions for **water quality** analyses, optimal WDN **calibration** and **rehabilitation** are being currently tested and will be released soon with **version 3**.

WNetXL offers a suite of MS-Office Excel functions which entails several typical analyses on Water Distribution Networks:

WNetXL is:

- self standing and readily usable without any additional software application
- fully integrated in MS-Office Excel environment
- setting parameters, input and output data are intuitively arranged in MS-Office Excel spreadsheets
